

How to Activate Air Show

YOO doesn't have a traditional display but there is a cool way to view your progress and it's called Air Show. Here's what you do:

1. Press the front, center button once to activate the LED lights.
2. Hold YOO with the YOO logo facing you and perpendicular to the ground.
3. Wave the devices from left to right and you will see your current step count appear in the air.
4. Waving YOO to reveal your progress will NOT create false step counts.

**Important:** If you don't see your step count the first time you wave your YOO2 just try again. Sometimes it takes a few tries.

If left-handed, hold YOO with forefinger next to button instead of thumb.

Where to Wear YOO®

You can attach YOO2 to anything you're currently wearing. Some examples are your waistband, a cuff or sleeve, your hat, shoe, pocket or collar. You can also comfortably slide YOO2 into a pocket, bra or sock.

Clip and Storage Options::

What Do I Need to Know About the Battery?

YOO2 uses a CR2032 3V Lithium battery. Hopefully you won't have to become a battery expert because this little guy should last over six months. If you do need a new battery you can buy one at most super markets and pharmacies.

Low Battery Alert

If your battery power is low, the center LED light will flash every 15 seconds to indicate that it is time to change your battery. By the time that happens you will have forgotten this little tid bit of information so we'll make it easy for you to find battery info on our website.

Battery Replacement

1. Go to a local supermarket or pharmacy and buy a CR2032 3V Lithium Battery.
2. You will need a precision Philips head screwdriver that fits 1.2mm screws.
3. Loosen the screws on the back of the device with the screwdriver to remove the cover.
4. Carefully remove the battery and dispose of it properly and safely.
5. Insert a new CR2032 battery with the positive side (+) up.
6. Place the cover back on and tighten the screws with a screwdriver.

Clearing the Current Step Count

Press and hold the front button for 5 seconds until all 5 LED light turn on.

Each LED will turn off one by one. Once all LEDs have turned off, the current step count will be cleared.

YOO® Memory

YOO2 can store up to 14 days of activity. The Full Memory Alert will start when the YOO2 is not synced over 10 days or more.

However, it doesn't really want to because you're supposed to be syncing to the YOO App daily and getting bonus points for doing so!

Full Memory Alert! Don't Freak Out!

If the memory is full you'll notice that once per minute, all 5 LEDs will flash. Think of it as your YOO2 saying "Help! I'm stuffed!"

Clearing the Memory

To clear the YOO2 memory, sync to the YOO app. YOO2 will thank you.

Care and Maintenance

Here are some smart things you can do to care for YOO.

Clean YOO with a soft dry cloth. Do not use any abrasive cleansers. Do not immerse YOO in water. Store YOO in a safe and dry place. Do not subject YOO to shock, extreme heat or long-term exposure to direct sunlight. Remove the YOO battery if the device will not be used for longer than three months. Yoo Trackit Jacket® contains a strong magnet so be careful using around electrical equipment and medical devices.

FCC Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device meets the FCC and IC requirements for RF exposure in public or uncontrolled environments.

Environmental Conditions

- YOO is water-resistant but not water-proof. It should not be used while swimming or submerged.
- Operating temperature: 32° to 104° F (0° to 40° C)
